Jonathan Zhang

Working on my first few projects! Here is some of the work I have done so far.

PyAlgo *in Python |* <u>unfinished</u>
- Personal study tool with canonical algorithm designs
- Comments on runtime and space-time complexity noted within each file

Personal Website *in HTML/CSS/JS with Bootstrap 4 |* <u>www.jonathanzhang53.github.io</u>
Note: The site domain may change soon, but the website source code is public on my GitHub.

Mini-Projects *in R |* <u>www.github.com/jonathanzhang53/r-markdown</u>
- Friendship Paradox Visualization with 1000 Nodes
- Human to Mouse Gene Conversion
- Seurat Visualization Tools
- Gene Database Sorting
